

Harvard Medical School Curriculum Vitae

Date Prepared: May 11, 2026
Name: Alexander J. Blood
Work Address: Brigham and Women's Hospital, Division of Cardiovascular Medicine, 75 Francis Street, Boston, MA 02115
Work Phone: 617-243-6587
Work Email: ablood@bwh.harvard.edu

Education

2010	BA	Neuroscience Entrepreneurship and Management	Johns Hopkins University, Baltimore, MD
2011		Microcredential in Cancer Biology	National Institutes of Health Foundation for Advanced Education in the Sciences, Bethesda, MD
2015	MD	Medicine	Zucker School of Medicine at Hofstra-Northwell, Hempstead, NY
2022	MSc	Epidemiology	Harvard T.H. Chan School of Public Health, Boston, MA

Postdoctoral Training

07/15-07/18	Resident	Internal Medicine	Duke University Health System, Durham, NC
07/18-07/21	Clinical Fellow	Cardiovascular Medicine	Brigham and Women's Hospital (BWH), Boston, MA
07/20-07/22	Research Fellow	Cardiovascular Medicine (Benjamin Scirica)	Brigham and Women's Hospital (BWH), Boston, MA
07/20-07/22	Clinical Fellow	Critical Care Medicine	BWH

Faculty Academic Appointments

2022-	Instructor	Medicine	Harvard Medical School (HMS), Boston, MA
-------	------------	----------	---

Appointments at Hospitals/Affiliated Institutions

2022-	Attending Physician	Surgery (Cardiothoracic)	BWH
2022-	Associate Physician	Cardiology	BWH
2022-	Senior Clinical Investigator	Data Science Office	Mass General Brigham

Other Professional Positions

2022-2024	Consultant	Walgreens Health	
2023-	Consultant	Porter Health	2 days/year
2023-	Consultant	Milestone Therapeutics	2 days/year
2024-	Consultant	Signum Health Technologies	2 days/year
2025-	Co-founder, CEO	AIwithCare	52 days/year

Major Administrative Leadership Positions**Local**

2022-	Medical Director of the Cardiac Intensive Care Unit	Medicine (Cardiology)	Newton-Wellesley Hospital, Newton, MA
2022-	Associate Director of Inpatient Services	Medicine (Cardiology)	Newton-Wellesley Hospital

2022-	Associate Director	Accelerator for Clinical Transformation	Mass General Brigham
-------	--------------------	---	----------------------

Committee Service

Local

2022	Cardiovascular Division Quality Committee	Newton Wellesley Hospital
2022		Inpatient representative to the Cardiovascular Medicine Quality Committee
2022-	Intensive Care Unit Quality Committee	Newton Wellesley Hospital
2022-		Cardiovascular representative to the Intensive Care Unit Quality Committee
2022-	Data Safety Monitoring Board for HI-PRO Clinical Trial	BWH
2024-	Mass General Brigham Heart ICU Committee	Mass General Brigham
2024-		Newton Wellesley Hospital Cardiac Critical Care Unit Representative

Professional Societies

2022-	American College of Cardiology	
2022-		Fellow
2025	The American Heart Association	
2025		Health Technology Advisory Group

Editorial Activities

Ad hoc Reviewer

Clinical Cardiology

Honors and Prizes

2010	Dean of Student Life	Johns Hopkins University
------	----------------------	--------------------------

2011	Best Research Poster Award	National Institutes of Health: National Institute of Child Health and Human Development	
2013	Citation for Service to the Community	Nassau County Office of the County Executive	Developed a nature conservatory and educational seminars for local youth regarding sustainable ecosystems and nutrition
2015	Alpha Omega Alpha Honor Society	Zucker School of Medicine at Hofstra-Northwell	
2015	Faculty Council Award for Leadership and Service	Zucker School of Medicine	
2016, 2018	Eugene Stead Research Grant	Duke University Internal Medicine Residency	
2017	Faculty Resident Research Grant	Duke University Internal Medicine Residency	
2017	Exceptional Service Commendation	Duke University Hospital Office of the Chief Executive Officer	Cited for providing high-quality humanistic clinical service to patients and their families
2017	High Value Research Grant	Duke University Internal Medicine Residency	
2020	Small Device Grant	Brigham and Women's Hospital Cardiology Division	
2020	World Health Innovation Forum Grant	Mass General Brigham	Recognized for contributions to healthcare delivery and chronic disease management research performed at Brigham and Women's Hospital and throughout the Mass General Brigham Health System.
2020-2022	T32 Training Award	National Institutes for Health	

2023	Locke Award for Excellence in Inpatient Education in	Newton Wellesley Hospital
2023	Massachusetts Digital Health Award	Massachusetts eHealth Institute Award
2023	Lerner Junior Faculty Research Award	Brigham and Women's Hospital
2024	American College of Cardiology Scientific Sessions 2024 Travel Award	Honored for invitation to present a late-breaking clinical trial at the 2024 ACC Scientific Sessions
2024	Commercialization & Inclusive Leadership Program	Mass General Brigham and Babson College

Report of Funded and Unfunded Projects

Funding Information

Past

2020-2023	The Diabetes Remote Intervention to Improve the use of Evidence-based medications (DRIVE) Novo Nordisk Co-Investigator (PI: Benjamin M. Scirica, MD, MPH) This study assessed whether a strategy of education-first, or simultaneous education with medication recommendations improves the use of guideline-directed medications in patients with type 2 diabetes at high cardiovascular and/or kidney risk.
-----------	---

2022-2024	SAIL - Supplementary Anti-obesity Medication Integration into Longitudinal Obesity Study Novo Nordisk; Investigator Initiated PI (\$689,215.00) The goal of this project is to understand the prevalence of obesity, demographics of the population with associated medical comorbidities, and medication utilization. We aim to develop an electronic health record screening tool to identify patients with obesity eligible for medical therapy.
-----------	--

Current

2025-End of Enrollment	Improving Lipid Optimization Quality and Treatment Options in ASCVD Merck Sharp & Dohme LLC Co-PI (Co-PI: Benjamin M. Scirica, MD, MPH) (\$ 891,906.25) The goal of this project is to utilize generative artificial intelligence to identify patients meeting guideline criteria for lipid-lowering therapy intensification, and subsequently assess if pharmacist-led pharmacotherapy management leads to improved lipid measures compared with patient and provider notification.
2023-End of Enrollment	Cooperative Program for ImpLementation of Optimal Therapy in Heart Failure (COPILOT-HF) Boehringer Ingelheim Co-PI (Co-PI: Benjamin M. Scirica, MD, MPH) (\$3,985,433.22) 1. Determine if a remote, or virtual, clinic that implements a standardized, stepped-approach to guideline directed medication optimization in patients with HF (across the spectrum of EF), will achieve a higher rate of guideline-directed medical therapy (GDMT) than a strategy of patient and provider education followed by remote HF clinic management. 2. Determine if the sequencing of GDMT initiation (traditional vs. SGLT2i-first) leads to improved GDMT intensification. This was investigator initiated.

2023-End of Enrollment	SAIL - Phase 2 Eli Lilly PI (\$494,347.00) Assess whether a remote clinic with health navigators backed up by clinical pharmacists and overseen by physician leadership can identify patients eligible for, and prescribe, anti-obesity medication therapy as part of a comprehensive remote weight management service offering.
2023-2025	A framework to Stratify Patient Cohorts for Clinical Management National Institutes for Health (NIH)/ National Heart, Lung, and Blood Institute (NHLBI) R01HL151643 Co-Investigator (PI: Kavishwar Waghlikar) This effort involves establishing a computer science focused framework to stratify patient cohorts for clinical management. This focuses on patients with heart failure and establishing clinical informatics-based techniques to better identify, characterize, and study this disease area and how to better serve patients who live with it.

Report of Local Teaching and Training

Clinical Supervisory and Training Responsibilities

2022-	Directly supervising patient care in the Cardiac Intensive Care Unit, Massachusetts General Hospital interns, junior, and senior residents	Newton Wellesley Hospital 8 hours/week 12 weeks/year
12/2025-	Directly supervising patient care in the Cardiac Intensive Care Unit, Massachusetts General Hospital interns, junior, and senior residents	Newton Wellesley Hospital 8 hours/week 8 weeks/year
2022-	Attending in Cardiology and Critical Care Cardiovascular Medicine, Anesthesia, and Critical Care Medicine Fellows	BWH 4 hours/week for 6 weeks/year

Research Supervisory and Training Responsibilities

2022-	Research mentorship Fellows in cardiovascular medicine and obesity medicine	BWH 4 hours / week; 40 weeks/year
12/2025-	Research mentorship Fellows in cardiovascular medicine and obesity medicine	BWH 4 hours / week; 20 weeks/year

Mentored Trainees and Faculty

2021-	Joshua Bosque-Hamilton, BA, MS/ Medical Student Drexel University College of Medicine <i>Career stage:</i> Medical Student. <i>Mentoring role:</i> Mentored through research hypothesis generation, study design and analysis, and publication. <i>Accomplishments:</i> Abstract submitted and accepted to national conference. Manuscript in progress.
2022-	Shahzad Hassan, MBBS, MS. Post-doctoral research fellow. Harvard Medical School. <i>Career stage:</i> Post-doctoral Research Fellow <i>Mentoring role:</i> Research mentor Mentored through research hypothesis generation, study design and analysis, and publication. <i>Accomplishments:</i> Abstract submitted and accepted to national conference. Manuscript in progress.
2022-	Ozen Unlu MD <i>Career stage:</i> Research Fellow in Cardiovascular Medicine. <i>Mentoring role:</i> Mentored through research hypothesis generation, study design and analysis, and publication. <i>Accomplishments:</i> Became a first-author on NEJM AI paper that I senior authored. Multiple abstracts and ongoing projects.
2022-	John Ostrominski, MD <i>Career stage:</i> Research Fellow in Cardiovascular Medicine. <i>Mentoring role:</i> Mentored through research hypothesis generation, study design and analysis, and publication. <i>Accomplishments:</i> Manuscript accepted in the Journal Obesity. Multiple national meeting abstracts.

Local Invited Presentations

No presentations below were sponsored by 3rd parties/outside entities

2020	Atrial Fibrillation: An evidence-based Clinical Update / Grand Rounds Hospital Medicine, BWH
2023	An Update on the Evidence in Cardiovascular Medicine for Primary Care Providers / Invited Lecture BWH Primary Care Retreat
2023-2024	Blackburn Course in Obesity Medicine / Invited Lecture Harvard Medical School, Boston, MA
2024	The Future of Healthcare Delivery: Innovations in Telemedicine, Digital Health, and Artificial Intelligence Cardiovascular Medicine Grand Rounds, BWH

Report of Regional, National and International Invited Teaching and Presentations

Those presentations below sponsored by outside entities are so noted and the sponsor(s) is (are) identified.

Regional

2023	The Future of Healthcare Delivery: Innovations in Telemedicine, Digital Health, and Artificial Intelligence / Invited Lecture Massachusetts Medical Society, Information Technology Awards, Waltham, MA
2025	The Future of Healthcare Delivery: Innovations in Telemedicine, Digital Health, and Artificial Intelligence/ Medicine Grand Rounds, Salem Hospital, Salem, MA
2025	The Future of Healthcare Delivery: Innovations in Telemedicine, Digital Health, and Artificial Intelligence/ Medicine Grand Rounds, Baystate Hospital, Springfield MA

National

2022	Type 2 Diabetes, Cardiometabolic Comorbidities, and use of evidence-based
------	---

- 2022 American Heart Association Innovation Pavilion: Beyond the Cuff: Novel Metrics and Digital Therapeutics/ Panelist
American Heart Association's Scientific Sessions, Chicago, IL
- 2023 Contemporary Prevalence, Comorbidity Burden, and Treatment of Overweight and Obesity: Insights From the Multicenter Mass General Brigham Healthcare System/Oral Presentation/Presenter
American Heart Association's Scientific Sessions, Philadelphia, PA (sponsored by Novo Nordisk)
- 2023 Creating a scalable, sustainable business model with Remote Patient Monitoring and Digital Therapeutics/Roundtable discussion/Panelist
American Heart Association's Scientific Sessions, Philadelphia, PA
- 2023 Health Tech Researchers/Roundtable Discussion/Panelist
American Heart Association's Scientific Sessions, Philadelphia, PA
- 2023 Going Back to the Heart of Cardiology; Cardiometabolic disease: Improving Cardiovascular Outcomes in Patients Living With Type 2 Diabetes, Overweight, and Obesity/ Invited Lecture/Speaker
(Medscape), Anaheim, CA
- 2024 The Future of Healthcare Delivery: Innovations in Telemedicine, Digital Health, and Artificial Intelligence / Grand Rounds
Naples Community Hospital, Naples, FL
- 2024 The Future of Healthcare Delivery: Innovations in Telemedicine, Digital Health, and Artificial Intelligence / Grand Rounds
Ochsner Medical Center, New Orleans, LA
- 2024 The Diabetes Remote Intervention to improve use of Evidence-based medications (DRIVE) Study: A randomized evaluation of a remote management program to reduce CV and kidney risk/ Late breaking clinical trial oral presentation.
(sponsored by Novo Nordisk)
The American College of Cardiology's Scientific Sessions, Atlanta, GA
- 2024 Manual versus AI-Assisted Clinical Trial Screening using Large-Language Models (MAPS-LLM)/ Late breaking science oral presentation
Featured Science: Health and Technology of the Future of Clinical Trials, The American Heart Association's Scientific Sessions, Chicago, Illinois

2025	Remote Implementation of Weight-Lowering Medications in Adults with Overweight and Obesity/ Oral Moderated Poster presentation American College of Cardiology Scientific Sessions, Chicago, IL
2025	Eligibility and Utilization of Semaglutide in Patients who meet SELECT study Criteria: An analysis of Current Practice Within a Large Health System/ Oral Moderated Poster presentation American College of Cardiology Scientific Sessions, Chicago, IL
2025	Value and Impact of AI Application in Health/Invited panelist Kaiser Center for Total Wellness, Washington, DC (sponsored by the American Heart Association)
2025	Houston AI, Medical Vertical/Invited panelist Texas Medical Center, Houston, TX

Report of Clinical Activities and Innovations

Past and Current Licensure and Certification

2018-	Certification, Internal Medicine, American Board of Internal Medicine (ABIM)
2021-	Certification, Cardiovascular Medicine, ABIM
2022-	Certification, Critical Care Medicine, ABIM
2024-	Certification, Obesity Medicine, ABOM

Practice Activities

2022-	Inpatient attending	Cardiac Intensive Care Unit and Inpatient Cardiology Service, NWH	84 hours/week; 12 weeks per year
2022-	Inpatient attending	Cardiac Surgical Intensive Care Unit, BWH	24 hours/week; 6 weeks per year

Clinical Innovations

A Remote
cardiometabolic clinic
(2018-)

Designed and built a business case for a remote cardiometabolic clinic at Newton Wellesley Hospital as a pilot for Mass General Brigham operations, leveraging remote and chronic care model payment mechanisms to support team-based intervention for high-risk patient populations.

Generative Artificial
Intelligence
(2023-)

I have developed a novel tool using large language models to leverage unstructured data to identify patients who would benefit from novel diagnostics and therapeutics. Using this tool, we have started with clinical trial identification and moved into quality of care assessments to focus interventions on areas with the most need. We are partnering with the Mass General Brigham population health office to identify patients at highest risk and deliver care through novel care models to improve metrics of chronic disease control.

Report of Technological and Other Scientific Innovations

Developed a
smartphone
application for
medical image data
sharing and team
activation (2020-)

Used and licensed by Duke University in secure medical image data sharing and call team activation. I conceptualized the innovation, wireframed the application, obtained funding for a minimum viable product, worked with the legal firm McDonnell, Boehnen, Hulbert, & Berghoff to submit Case No.: 17-1019-WO-US serial number 16/636,524 USPTO. Submitted and was awarded a process patent: Case No.: 17-1019-WO-US serial number 16/636,524 USPTO.

Report of Education of Patients and Service to the Community Activities

2022-

American Heart Association/ Dallas, Texas
Health Technology Advisory Group

As a volunteer to the American Heart Association's Health Technology Advisory Group Dr. Blood provides content for patient and provider-facing education and training in technology and digital tool applications to healthcare delivery and consumption.

Narrative Report

I am an Associate Physician in the Division of Cardiovascular Medicine at BWH, a Senior Clinical Investigator at the Center for Clinical Data Science at Mass General Brigham, and an Instructor in Medicine at HMS. My area of excellence is Clinical Expertise and Innovation.

Clinically, I am the Associate Director for Inpatient Services and the Director of the Cardiac Intensive Care Unit at Newton Wellesley Hospital. I also attend in the cardiac surgical intensive care unit at BWH and enjoy the acuity and variety of patients we care for in today's modern cardiac intensive care unit.

I have been developing skills in research and implementation science throughout my medical training and practice. As a research fellow at BWH, I developed research protocols and published in remote healthcare delivery. This work was initially in heart failure with reduced ejection fraction, however, has been reaching further into the root causes of cardiometabolic disease in addressing hypertension, hyperlipidemia, type 2 diabetes, and obesity. I have developed novel care delivery paradigms through which population health

efforts can be delivered to patients at scale across the Mass General Brigham healthcare system. I have also integrated novel technologies and tools, including generative artificial intelligence, to the appropriate identification of patients to advance quality of care and implementation science.

How to overcome barriers to implementation of guideline-recommended care and establishing systems to identify, address, and continue to monitor appropriate patients for dietary, lifestyle, medical, and procedural therapy when clinically indicated are my research passions. Through my role on the American Heart Association's One Brave Idea research grant and, subsequently, my position at the Mass General Brigham Data Science Office, I have begun to incorporate the use of artificial intelligence and large language models into clinical trials and clinical practice.

I mentor BWH cardiovascular medicine and obesity medicine fellows through the design, conduct, and execution of clinical trials and quality improvement programs in cardiometabolic disease. Clinically, I supervise MGH residents in the cardiac intensive care unit at Newton Wellesley Hospital, as well as Pulmonary and Critical Care, Cardiothoracic Surgery, and Anesthesia Fellows in the Cardiac Surgical Intensive Care Unit at BWH.
